EDUCATION

University of Central Florida · Orlando, FL — Expected May 2030
B.S. Electrical Engineering

TECHNICAL SKILLS

Hardware	PCB design (KiCad / Altium), schematic capture, soldering, using a multimeter
Programming	Java (certified), Python
CAD & Fabrication	Fusion 360, woodworking, operating a lathe machine, drill press, CNC laser machine.
Certifications	Certiport: Java Specialist, 2025

PROJECTS

Transponder · Handheld E-Ink Planner — June 10, 2026 – Present

- Co-designing an offline-first handheld calendar and task device with a touchscreen display
- Designed a power circuit around the Raspberry Pi Zero, achieving a long battery life, compact size, and a slightly inexpensive cost figure.
- Modeled and 3D-printed the enclosure in Fusion 360 across multiple iterations

USB PCB · PCB designing — September 20, 2026

- Designed a USB drive on KiCad

LEADERSHIP & ACTIVITIES

Robotics Club (Team Resistance) · CAD designer / Electrical wirings checker — Aug 2024 – May 2026

- Assisted in prototyping a 21” x 21” robot through CAD software, particularly in Fusion360
- Partook in various electrical systems checks on different parts of the robot.
- Worked on the drill press, lathe, and band saw machines.

ISSDC - Winner · Operations member / Electrical systems — July 26, 2024 – July 28, 2024

- An international competition that took place at the NASA Kennedy Space Center in Cape Canaveral. In the 2024 year competition, all teams had to design a complete, functional settlement plan on the moon: “Balderol”.
- Assisted the Operations department in implementing a safe placement of all electrical systems, subsystems and the nuclear reactor.
